

# ***SIMPLE STEPS TO STAY SAFE ONLINE!***

**1**

## ***DON'T POST PERSONAL INFORMATION ONLINE***

Don't post personal information such as your home address, email address, name of school or your mobile number online.

## ***THINK BEFORE POSTING***

Think carefully before posting pictures or videos of yourself. Once you've put a picture of yourself online most people can see it and may be able to download it, it's not just yours anymore.

**3**

## ***SETTINGS***

Keep your privacy settings as high as possible. Ask an adult or older sibling to help you!

## ***PASSWORDS***

Don't share your password with anyone, this includes your best friend. It may seem like an innocent thing to do, but it is never a good idea. Once someone has your password, there is a lot they can do with your account. The only person who should know any of your passwords are your parents/carers. Also make sure that you have a strong password.

**5**

## ***STRANGERS***

Don't talk to people you don't know in real life online. Even if it is your best friend's older cousin or if they're offering to earn you extra points in a game! - Don't do it!

## ***FAKE ACCOUNTS***

Remember that not everyone online is who they say they are. That is why it is important that we only talk to people who we know in the 'offline' world.

**7**

## ***THINK BEFORE SENDING***

Think carefully about what you say before you post something online. If you post, send or share something which is considered negative, harmful or mean about someone it could be considered cyberbullying!

## ***RESPECT***

Respect other people's views. Even if you don't agree with someone then it doesn't mean you need to be rude. It also doesn't mean that your view is right and theirs is wrong.
